The City of Tempe is offering a High Efficiency Turf Irrigation Rebate to Tempe single family residents who install or upgrade to high efficiency spray nozzles, rain sensors, and/or controllers. Qualifying residents can receive up to \$500 towards the purchase of high efficiency components *once* they have completed a City of Tempe home water landscape audit. Contact the City of Tempe Water Conservation Office today to schedule your free home water landscape audit (HWLA). The City recommends that the installation of irrigation components be performed by a qualified irrigation technician. It is the responsibility of the owner to insure proper installation. After a HWLA has been performed and the recommended components are installed, please mail completed application and copies of original purchase receipts to the address above and Water Conservation staff will be in touch to schedule a time to verify installation. Once installation has been verified the City will reimburse up to 100% of the purchase price not to exceed \$500. *Note: All rebates provided will be on a first come, first served basis, subject to limited availability of funds. The City reserves the right to determine qualifications to this rebate program.*
